

Designed by credit practitioners for collection people

Designed by credit practitioners, the software architecture runs on Windows platform based on Microsoft technology on client/servers and .NET Technology. Because we're at the business level, we know what it takes to be competitive. It is highly customizable and integrates with companies' existing systems. Our systems are completely scalable and customizable to meet your needs regardless of your size of collection shop and type of businesses. Tested and proven, the system is intuitive for anyone who knows collections. Collectors will take only one day to learn to use the system and immediately maximize on productivity and effectiveness to enhance your profitability.

B.E.S.T. Gold and Platinum Editions offer all the capabilities you ever need to regularize your delinquent accounts.

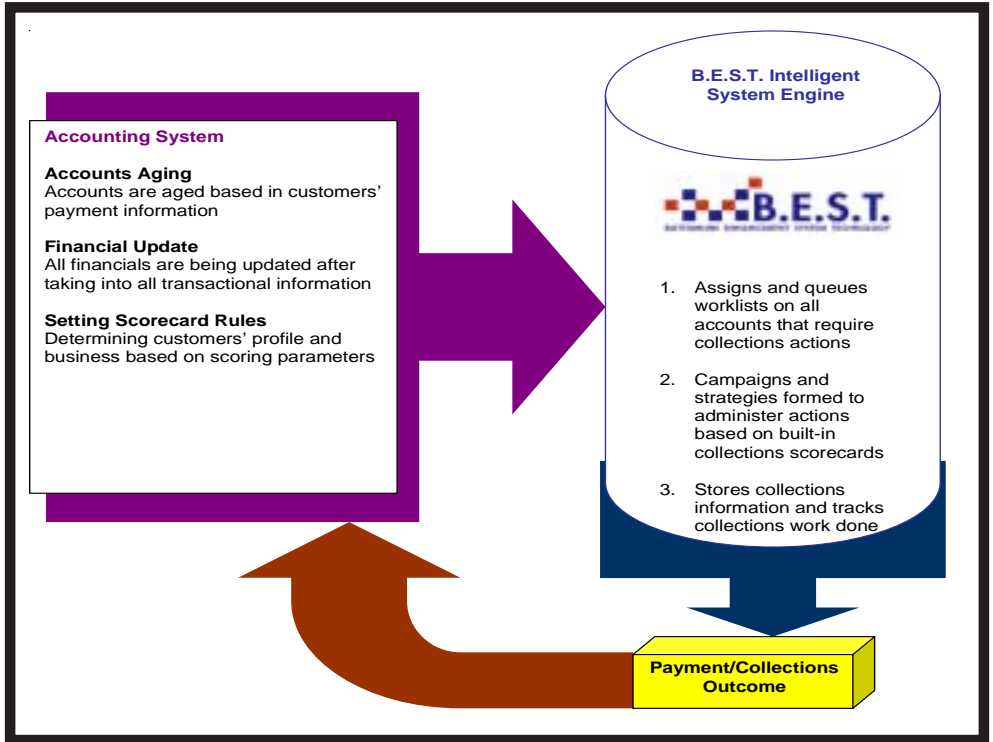

Regularize

more delinquent accounts with **Bottomline Enhancement System Technology** Collection Software
